EDUCATION

Pillai College of Engineering, New Panvel

2023 – 2027

Bachelor of Technology (B.Tech) in Electronics & Computer Engineering

EXPERIENCE

Backend Developer Intern | UTSAVY

Dec 2025 – Feb 2026

React, TypeScript, Supabase, Vercel

- Developed and integrated **10+** responsive digital invitation templates, enhancing platform customization and user experience.
- Built frontend features and UI improvements using React, leveraging AI-assisted development tools such as Lovable while manually implementing application logic and backend integrations.
- Contributed to backend development using Supabase, including database integration, API interactions, and feature implementation for production deployments on Vercel.
- Collaborated on implementing custom domain (DNS) mapping for invitation websites, researching and testing the infrastructure required to support user-owned domains.

SELECTED PROJECTS

AI API Generator

Next.js, TypeScript, Node.js, Vercel AI SDK

Building an AI-powered developer platform that transforms OpenAPI 3.x specifications into **5+** development artifacts including TypeScript SDKs, API documentation, unit tests, Postman collections, and request examples with streaming AI responses and multi-provider LLM support.

DBnanoJS

TypeScript, Node.js

Designed and published an embedded NoSQL database implementing **6** core components including append-only storage, hash-based indexing, schema validation, in-memory caching, advanced query operators, and a fluent TypeScript query builder as a reusable npm package.

Mail Assist Web-App

Next.js, Supabase, Resend API

Developed an email automation platform supporting anonymous messaging, reusable templates, email tracking, CSV-based batch email processing, and backend APIs integrating **3** core services for scalable email delivery.

Decentralized Healthcare Web-App

FastAPI, PyTorch

Built a federated learning platform for decentralized chest X-ray classification featuring **4** key modules: local model training, secure weight aggregation, REST APIs, and an administrative dashboard for real-time evaluation.

LEADERSHIP & ACHIEVEMENTS

- Head of Technical Student Chapter (CSI-PCE), leading **8+** technical initiatives, organizing **6+** technical events, and delivering **4+** workshops on Vibe Coding, Full-Stack JavaScript Development, and Competitive Programming for **200+** students.
- Secured a **Top-10** position in Hack to Crack 1.0 among **50+** participating teams.
- Selected for the **SIH 2024 Waitlist** after progressing through the internal college selection process among **200+** teams.
- Awarded **2nd Prize** at the Inter-School Science Exhibition for designing and developing an automated smart-home prototype for people with disabilities.

SKILLS

Languages: TypeScript, JavaScript, Python, C++, Java

Backend: Node.js, Express.js, FastAPI, REST APIs, GraphQL, WebSockets

Databases & AI: PostgreSQL, MongoDB, Supabase, Firebase, Vercel AI SDK, OpenAI API, Prompt Engineering

Cloud & Tools: AWS, GCP, Vercel, Railway, Git, GitHub, Postman, VS Code
